

**Publications and products of the
Marine Extension Service
University of Georgia
Since its founding in 1970**

Mission: The Marine Extension Service works to increase the efficiency of existing marine industries, to identify new industries that do not harm the environment, and to increase public awareness and understanding of coastal ecosystems. The coordinated programs of research, advisory services and education carried out from offices in Athens and Atlanta and from facilities on Skidaway Island, Savannah and in Brunswick extend economic and cultural benefits throughout the state and region.

**Publications, Marine Extension Bulletins, Technical Reports,
Dissertations, Master Theses, Educational Material, Videos and
Posters Produced by Personnel of the University of Georgia
Marine Extension Service:**

Authors in bold print are/were employees of the Marine Extension Service

Publications were considered produced by a Marine Extension Service employee if the address on the publication listed the Marine Extension Service as the corresponding address.
